

Ariana

German

Origin: Germany. Bred at the Hüll Hop Research Center, Ariana is a cross between Herkules and a wild male hop.

Usage: Aroma. Although high enough in alpha acids to handle bittering duty, Ariana's oil content and organoleptic profile make it a great finishing hop.

Aroma & Flavor Characteristics: Fruity, with berry and citrus high notes backed by resinous and herbal tones.

Botanical Classification:

Family: Cannabaceae

Genus: Humulus

Species: Lupulus

Maturity: Late

Yield: No data available

Alpha Acid Range %	10.0 - 13.0
Beta Acid Range %	4.5 - 6.0
Co-Humulone as % of alpha	40 - 42
Total oils mL/100 gr.	1.6 - 2.4
