

Expertise in Distilling Ingredients

SUSTAINABLE SOLUTIONS TO SUPPORT THE DISTILLING PROCESS

How Kerry uniquely delivers value

With intimate understanding of changing category and consumer expectations and the production challenges against these, we'll deliver creative ways to support the distilling industry.

Our distilling ingredient expertise with unrivaled technology know-how helps to optimize the distilling process and deliver great taste in a sustainable and efficient way.

PORTFOLIO

Hitempase™	Liquefaction
Promalt™	Saccharification & Viscosity reduction
Bioglucanase™	Filtration & Viscosity reduction
Bioprotease™	Fermentation
Convertase™	Saccharification
Amylo™	Saccharification
FermCap™	Fermentation
Yeastex™	Fermentation

Enzymes, Ingredients & Flavors

SUSTAINABLE SOLUTIONS ACROSS THE DISTILLING PROCESS

- Complete liquefaction of adjunct
- Obtain maximum extract with good run-off/mash filter throughput
- Dextrin/glucan degradation
- Increased fermentability
- Reduced foaming
- Increased fermentability
- Reduced foaming
