

## Candurin®

Edible glitter adds sparkle and cascading, swirling motion to the presentation of beer and other beverages.

Candurin® is based on a natural silicate combined with titanium dioxide to fulfill international safety standards for food products and full GMP compliance.

## Suggested usage rates:

- 0.3-0.4 g/L
- 1.2-1.6 g/Gal
- 36.5-48.5 g/bbl

*It's recommended to trial different dosage rates in samples to determine optimal addition rate.*

*See regulatory overview document for application limits.*

## Dosing instructions:

Candurin® should be added to bright beer after filtration and roused or mixed with CO<sub>2</sub>.

## Pack size:

1 kg (treats 20-27 bbl)
