

Australian Vic Secret

Australian

Origin: Australia. Developed from a seedling bred in Victoria in 2000 and known initially as Cultivar #00-207-013, Vic Secret shares parentage with Topaz. It was released for commercial production in 2013.

Usage: Aroma - specifically as a whirlpool and dry hop. In trials, late kettle additions were found to emphasize earthy aspects with little fruit, while whirlpool and dry hop additions will maximize impact of its high myrcene fraction.

Aroma & Flavor Characteristics: Clean and bright tropical character (passionfruit, pineapple) with supporting notes of fresh herbs and pine needles. Similar to Galaxy™ but lighter and less dominating.

Maturity: No data available

Yield: 2,310 - 3,290 kg/ha

Alpha Acid Range %	14.0 - 17.0
Beta Acid Range %	6.1 - 7.8
Co-Humulone as % of alpha	51 - 56
Total oils mL/100 gr.	2.2 - 2.8
