

Idaho 7

American

Origin: USA. An experimental variety from Jackson Hop Farm in Wilder ID, first released in 2015.

Usage: Primarily aroma and dry hopping due to its potent aroma and flavor, but high enough alpha acids to contribute good bitterness. Excellent as a single hop or part of a blend for IPA, pale ale, and hop-forward American wheat beers.

Aroma & Flavor Characteristics: Pungent tropical fruit and citrus (think apricot, orange, red grapefruit, papaya) with big notes of resiny pine and hints of black tea.

Maturity: Late

Yield: 2,000 - 2,200 lbs/acre

Alpha Acid Range %	9.0 - 12.0
Beta Acid Range %	4.0 - 5.0
Co-Humulone as % of alpha	30 - 40
Total oils mL/100 gr.	1.0 - 1.6
