

Summit™

American

Origin: Washington, USA. Bred from Zeus, Nugget, and a number of USDA males, Summit™ was introduced by the American Dwarf Hop Association in 2003.

Usage: Very high alpha levels make it an unparalleled bittering hop, but Summit™ is fully dual purpose - although its flavor can be love it or leave it for some. For those who love it, Summit™ excels as early or late additions in hoppy American-style ales.

Aroma & Flavor Characteristics: Heavy and big displaying signature citrus intensity (especially grapefruit & tangerine); can also have an earthy onion/garlic quality. Harvest conditions help determine balance between citrus and onion/garlic character.

Maturity: No data available

Yield: No data available

Alpha Acid Range %	15.0 - 18.0
Beta Acid Range %	4.0 - 6.0
Co-Humulone as % of alpha	26 - 33
Total oils mL/100 gr.	1.5 - 2.5
